

IN THE CLAIMS:

The text of all pending claims, (including withdrawn claims) are set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~strikethrough~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered). Please AMEND claims 1, 11, 12, 14, 19, 25 26, 29 and 30, and ADD new claim 31 in accordance with the following:

- 57, 1
Q
- d
1. (currently amended) A system, comprising:
at least one computer having:
a continuously running event creation process determining whether a system initiated and created event is due to be created and creating the event when due; and
a continuously running pricing process pricing the system-created events and non-system-created events as they become available to the system.
 2. (original) A system as recited in claim 1, wherein all events are priced as they become available to the system.
 3. (original) A system as recited in claim 1, wherein all system-created events are created at any time based on a flexible schedule independent of a billing process.
 4. (previously presented) A system as recited in claim 3, wherein system initiated and created events for a customer may be created in one of less frequently than the customer is billed, as frequently as the customer is billed and more frequently than the customer is billed.
 5. (original) A system as recited in claim 1, wherein summary events are created and maintained in real-time as events are priced.
 6. (original) A system as recited in claim 1, wherein all events are available for contribution to summary records for discounting and consolidation.
 7. (original) A system as recited in claim 1, wherein charges for all events that are relevant to a billing period are calculated and available in the system at the earliest practical

time.

8. (original) A system as recited in claim 1, wherein processing for calculating charges to be billed in a current billing period is outside the billing process.

9. (original) A system as recited in claim 1, wherein charges for all unbilled events are ready for the billing process and ready for display on-demand.

10. (original) A system as recited in claim 1, wherein said pricing process performs real-time recalculation of a charge for any unbilled event when information in the system which impact the charge has changed.

CJ and
11. (currently amended) A computer implemented process, comprising:
determining, by a computer, whether a system initiated and created event is priceable;
pricing, by the computer, the event responsive to the determining.

03
12. (currently amended) A process as recited in claim 11, wherein priceable events are priced immediately.

13. (original) A process as recited in claim 11, wherein all charge events are priced in real-time.

CM
14. (currently amended) A computer implemented process, comprising:
determining, by a computer, whether an event is priceable; and
pricing, by the computer, the event responsive to the determining, wherein all available system initiated and created charge events for a current billing period are priced at a first opportunity after a prior billing period ends.

15. (original) A process as recited in claim 11, wherein a usage event is priced at a time that the usage occurs.

16. (original) A process as recited in claim 11, wherein a recurring charge is calculated

after an end of a prior billing period and before the billing date for the recurring charge.

17. (original) A process as recited in claim 11, wherein a minimum or a maximum charge is calculated and captured in a summary after an end of a prior billing period and before the billing date for the recurring charge.

18. (original) A process as recited in claim 11, wherein charges for summary events are calculated on-demand at a time of charge display.

05 19. (currently amended) A computer implemented process, comprising:
determining, by a computer, whether a system initiated and created event is due to be created; and
creating, by the computer, the event responsive to the determining.

20. (previously presented) A process as recited in claim 19, wherein system initiated and created events are created independent of other processes.

21. (previously presented) A process as recited in claim 19, wherein system initiated and created events are created according to a schedule in the system.

22. (original) A process as recited in claim 21, wherein said schedule is created and maintained by the system based on subscription information available in the system.

23. (original) A process as recited in claim 19, wherein a recurring event is created after an end of a prior billing period and before the billing date for the recurring charge.

24. (original) A process as recited in claim 19, wherein minimum and maximum charge summary events are created after an end of a prior billing period and before the billing date for the recurring charge.

06 25. (currently amended) A system, comprising:
a computer having:
a continuously running event creation process determining whether a system initiated

and created event has become current; and

a continuously running pricing process pricing the system-created events and non-system-created events as they become available to the system, and creating and maintaining summary events in real-time as events are priced.

26. (currently amended) A system, comprising:

a computer having:

a continuously running event creation process determining whether a system initiated and created event is due to be created and creating system-created events at any time based on a flexible schedule; and

CU a continuously running pricing process, independent of a billing process, pricing of the system-created and non-system-created events as ready for the billing process and for display as they become available to the system with all events priced as they become available to the system and creating summary events as events are being priced and performing real-time recalculation of a charge for any unbilled event when information in the system which impacts charge has changed.

27. (previously presented) An apparatus, comprising:

a source of system initiated and created events; and

a processor pricing the events when the events are priceable.

28. (previously presented) A computer readable storage medium including a process controlling a computer and having a continuously running event creation process determining whether a system initiated and created event is due to be created and a continuously running pricing process pricing the system-created events and non-system-created events as they become available to the system.

29. (currently amended) A system providing pricing information for on-demand billing for events, comprising:

07 a message queue receiving events including system initiated and created events and usage events; and

a processor performing a pricing process where events are continuously delivered to the pricing process via the message queue and priced.

30. (currently amended) A continuous pricing process for an event-driven system, comprising,

storing events in a message queue, the events being ~~one of system~~ initiated and created events, usage events, one time events, ~~or~~ and summary events;
delivering the events in the message queue to a pricing process; and
pricing the events.

31. (new) A system, comprising:

at least one computer having:

a continuously running event creation process determining whether a system initiated and created event is due to be created and creating the event when due;

a continuously running pricing process pricing the system-created events and non-system-created events including usage events as they become available to the system producing priced events; and

an intermittently running billing process running responsive bill cycles and customer on demand billing information requests and producing a bill using the priced events.
